

Jupiter moves from **Cancer** sign (Kataka **Rashi**) to **Leo** sign (Simha Rashi) on 14th July 2015 and will remain there until 11th August 2016 – as per Thirukanitham calculation. Its effects on individuals an overview.

In our solar system, different planets take different time lines to revolve around the sun- for example planet Jupiter takes 12 years to complete a cycle and planet Saturn 30 years. Vedic Astrology considers the location of the Moon in an individual's birth chart and that particular house is called the **Rashi**. There are 12 zodiac signs namely – Mesham, Rishabam, Mithunam, Katakam, Simam, Kanni, Thula, Viruchikam, Dhanus, Makaram, Kumbam and Meenam.

Planet Jupiter is mostly considered as a benefic and will transform the houses it aspects. Jupiter aspects 5th, 7th and 9th houses from its position. Jupiter is also known as the protector... God planet. Today even astronomers agree that Jupiter is the protector - due to its size and massive gravity this planet pulls mostly all the space debris like asteroids coming into our solar system from outer space to itself and thereby protecting our Earth from destruction. This is the reason Jupiter's surface looks dented.

Dr. PR Sundhar Raja, Astrologer based in Chennai, confirms that Astrologers before giving predictions, should study the position of Jupiter in Navamsa, Bhava chart and the current positions of other major planets like Saturn, Mars, Sun, Mercury, Venus, etc. into consideration. Also they should take Shad Balas, considered as 6 pillars of astrology – Sthana bala, Dik bala, Kala bala, Chesta bala, Naisarga bala and Drik bala – and also look carefully into the Dasa and Bukthi (Sub Dasas) before coming to the final conclusion.
